Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: "vile" should be spelled - - vial - -. Appropriate correction is required.

Claim Objections

Claims 1, 5, 7 and 9-13 are objected to because of the following informalities: "vile" should be spelled - - vial - -. Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 3, it is not clear how two opposite ends of the interior surface of the guide meet.

Claim 8 recites the limitation "In the puncturing process" in line 1. There is insufficient antecedent basis for this limitation in the claim.

In regard to claims 14-16, the phrase "can be" is indefinite because it is not clear whether the structure is claimed or not.

Claims 1, 8, 10 and 13 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by LeMarie.

In regard to claims 1-3, 10 and 13, the LeMarie reference discloses a “syringe guide” 10 having “large” 10a and “small” 10b diameters, as claimed.

In regard to claim 4, inasmuch structure that is defined by “slit”, the u-shaped opening (col. 2, line 50) meets the claimed limitation.

In regard to claim 5, see vial 14 and syringe 12.

In regard to claims 6 and 7, the vial and syringe dynamically move toward each other.

In regard to claims 8 and 9, Figure 2 shows a central puncture.

In regard to claims 11 and 12, see column 1, lines 34-42.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over LeMarie.

The method of forming the device is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Zolentoff et al, Furr et al, Tetreault and Wood et al pertain to various syringe guides, similar to Applicant's device.
